What's New in Version 3.5.1.1

CMT for Coexistence (CMTc) 3.5.1.1 resolves two issues. An issue where received SMTP emails did not include the Reply-To address and an issue where location field text was getting added to the Required field of the final delegated invite have been fixed.

This release was verified in the following environment:

- Domino 9.0.1
- Outlook 2016 clients
- Notes 8.5 client

Release Notes 3.5.1.1

- An issue where location field text was getting added to the Required field of the final delegated invite for meetings sent by an Outlook chair to a Notes user and then delegated to another Outlook user has been resolved. (5379)

- An issue where received SMTP emails did not include the Reply-To address has been resolved. (5375)

About Binary Tree

Binary Tree provides organizations with the most direct and predictable path to a successful technology transformation. We offer software and services to integrate and migrate corporate email, directory and server environments. Our technology, methodology and expertise is uniquely suited to provide fast and manageable migrations, with low risk, little to no user downtime, and adapted to each customer's environment and requirements. Since 1993, Binary Tree has enabled thousands of enterprise customers to migrate more than 35 million email users and facilitated some of the most complex technology transformations on the planet. Binary Tree is a Microsoft Gold Partner and a globally preferred vendor for Microsoft Office 365 migrations and solutions. The Company is headquartered outside of New York City with offices in Hong Kong, London, Paris, Stockholm and Sydney. For more information, visit us at www.binarytree.com.
