

ACTIVE DIRECTORY ASSESSMENT

POWERED BY BINARY TREE

Do a proactive health check for a successful transformation

Since Active Directory is such a key part of your systems, migrating it can be a complex challenge. Before you get started, it's best to do an assessment of your Active Directory environment. This can help you find and fix any issues that might slow down your migration or—worse—impact your users.

A proactive assessment often saves 2-4 times the cost of fixing issues with Active Directory during and after a migration. Plus, those who try to do an assessment themselves often spend 5-10 times more in staffing and operational costs than when they work with an experienced partner like Binary Tree. An assessment from Binary Tree is a cost-effective way to check the health of your Active Directory and get ready for an efficient migration, including to Office 365. It's a comprehensive service, delivered in three phases:

- PHASE 1
 - › Lead onsite kickoff / workshop
 - › Identify your criteria for success
 - › Identify your migration plan
 - › Review technical requirements
 - › Install and set up assessment tools

- PHASE 2
 - › Execute and monitor progress
 - › Review current state of your AD environment

- PHASE 3
 - › Identify AD or setup issues
 - › Develop a remediation report
 - › Share findings and recommendations

WHY DO AN ASSESSMENT

- › Check the health of the AD environment and find ways to improve performance
- › Don't waste resources on a self-assessment, which can take 5-10 times longer
- › Cut migration costs by 2-4 times
- › Migrate to Exchange or Office 365 more quickly

ABOUT ACTIVE DIRECTORY PRO

- › Migrates without trust requirements
- › Designed for complex enterprise migrations; scales for all organizations
- › Flexible enough to move all relevant objects, settings, and properties
- › Highly secure; no ports into a firewall

Comprehensive migration solution

Get a full health check of your environment before, during, and after your migration. This gets you ready to use Active Directory Pro to migrate your relevant objects, settings, and properties.

Find and fix issues

Our thorough analysis of your Active Directory environment will find issues that might affect your migration. Then you can use the remediation report to get your Active Directory in tip-top shape to migrate.

Efficient analysis

For your convenience and efficiency, you'll get a clear analysis of your Active Directory environment in three, straight-forward phases: ramp up, analyze, and report.

Save time and money

Don't waste valuable resources on time-consuming self-assessments. An Active Directory Assessment from Binary Tree can save you 5-10 times the effort. It also reduces overall costs of fixing issues by up to 4 times the alternatives.

Service highlights

- › Initial kickoff and discovery
- › In-depth analysis of your environment
- › Presentation and report

Benefits

- › Reduce time to migrate to Exchange or Office 365
- › Increase predictability
- › Prevent budget overruns
